DETAILED ACTION

1. Examiner regrets the untimely reopening of prosecution.
2. Applicant's amendment and accompanying remarks filed March 12, 2007 are acknowledged.
3. The rejection of claims 1-7 and 9-10 under 35 U.S.C. 102(e) as being anticipated by Thoms et al., U.S. Pre Grant Publication 2003/0205696 is withdrawn due to applicant's argument.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7 and 9-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Thompson et al., U.S. Patent Number 6,902,830.

Thompson discloses organic light emitting devices wherein the emissive layer comprises a host material and an emissive molecule (see abstract and column 6, lines 30-68). Additionally, the reference discloses that the emissive molecule can be selected from the group of phosphorescent organometallic complexes such as fac tris(2-phenylpyridine) iridium. Column 32, lines 42-68 of

the reference disclose molecules that fall within the scope of the host material. The reference discloses molecules such as

wherein a line segment denotes possible substitution at any available carbon atom or atoms of the indicated ring by alkyl or aryl groups (see column 32, line 40-column 33, line 33). The Thompson reference reads on the present claims when R_1 and R_2 are alkyl or aryl; n_a and n_b are both 1 and Ar_1 represents a phenylene group substituted with an alkyl or aryl group.

Response to Arguments

6. Applicant's arguments with respect to claims 1-7 and 9-10 have been considered but are moot in view of the new ground(s) of rejection.
